TACT™

TACTICAL AID AND COLLABORATION TOOLSET

CRISIS NEGOTIATION SOFTWARE

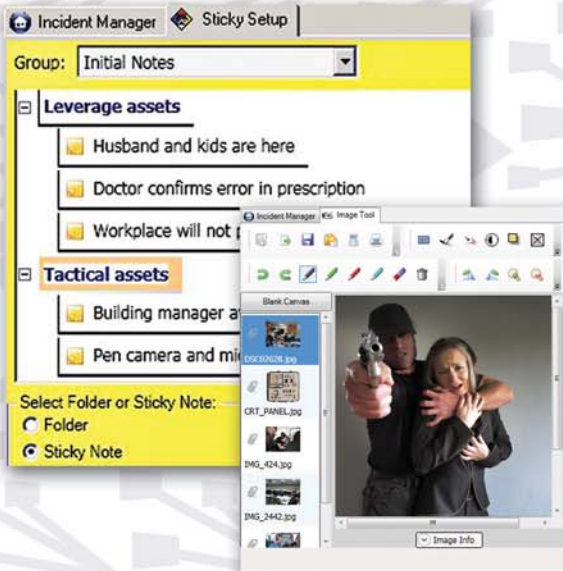

Tactical Aid and Collaboration Toolset (TACT™).

Based on national guidance and training for Crisis Negotiation Teams, the TACT™ solution provides specific collaboration tools and data sets. TACT™ assists the tactical and crisis negotiation team in management of hostage and barricade incidents, kidnappings, suicides, and more.

TACT™ gives you the right information, from the right people, in the right format... Right now.

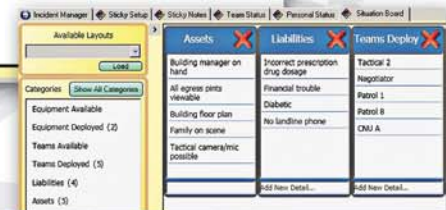

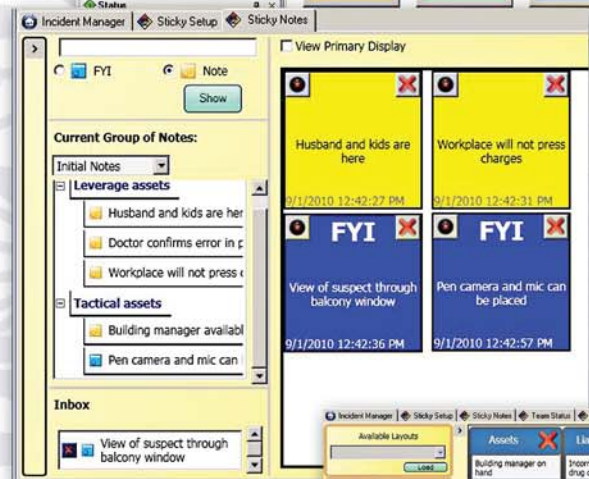

TACT™

- TACT™ consists of negotiation aides, a digital situation board, chat, tools for the coach and the primary negotiator
- Connect a throw phone and record and exchange audio, video, and pictures with the tactical team and offsite team members
- Quickly collect intel reports from team members offsite, building complete situational awareness
- Collaboration at your fingertips. Every response team member is connected by a suite of collaboration tools including call recording, interactive situation board, chat, and more
- Communicate important incident information without breaking radio silence
- Available for PC, Web, and Blackberry/iPhone/Android
